

"High Accuracy Atomic Physics in Astronomy", IP/ITAMP workshop, August 7-9, 2006, The Harvard-Smithsonian Center for Astrophysics, Cambridge, MA, in honor of Prof. Micheal J. Seaton

INTERACTIONS OF THE SOLAR WIND

Alex Dalgarno

ITAMP, The Harvard-Smithsonian Center for Astrophysics, 60 Garden Street, Cambridge, MA 02138, USA

Email: dalgarno@cfa.harvard.edu

The highly charged ions of the solar wind interact with the gases in the atmospheres of comets and planets and with the interstellar hydrogen and helium atoms. They produce X-rays by the process of charge transfer. Charge transfer also leads to emissions in the extreme ultraviolet. The relationship of the spectral features in the extreme ultraviolet and in the X-ray regions will be explored.
