SMA Observations of Mass Loss from OH/IR Stars in the Galactic Bulge

B. Sargent, N. A. Patel, M. Meixner, M. Otsuka, D. Riebel, S. Srinivasan, F. Kemper, J. Kastner

- SMA CO J = 2 – 1 (above, from Sargent et al 2013) and CO J = 3 – 2 data for OH/IR stars in Galactic Bulge
- Determine gas mass-loss rates, combine with modeling dust emission in infrared spectral energy distributions to determine stars’ gas-to-dust ratios
- Eventually apply gas-to-dust ratios to studies of AGB stars in other galaxies
